DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In regard to claims 1-19, the prior art does not disclose the combination of limitation of the claimed invention, specifically the limitations of:

a recording signal output circuit that repeatedly stores electrical charges at said image-capturing element and reads out image data from said image-capturing element to store said image data at said buffer memory unit when either continuous shooting mode has been set by said continuous shooting setting unit and compresses and outputs image data corresponding to a frame which has been read out from said buffer memory unit immediately before, while electrical charges for the next frame are being stored during, at least, a period of time in which said second continuous shooting mode has been set, as claimed in claim 1.

In regard to claim 20, the prior art does not disclose the combination of limitation of the claimed invention, specifically the limitations of:

a recording signal output circuit that repeatedly stores electrical charges at said image-capturing element and reads out image data from said image-capturing element to store said image data at said buffer memory unit when said continuous shooting mode has been set by said single shot/continuous shooting setting unit and compresses and outputs image data corresponding to a frame read out from said buffer memory unit immediately

before, while electrical charges are being stored for the next frame as claimed in claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2004/0056960, discloses an electronic camera with a single shot operation, continuous shooting operation, and high-speed continuous shooting operation. US 6,876,393, discloses an electronic camera with single shot, continuous, and high-speed continuous modes.
